PPM Works Services and Solutions

Each company is unique. One-size-fits-all approaches will never help your business reach its full potential. We deliver custom PPM solutions and services, tailored to you – your industry, your culture, your one-of-a-kind challenges.

Solutions

- Project Online Quick Start
- Industry Solutions
- PMO On-Demand
- Data Warehouse

- Report Pack
- PPM Discovery
- Office 365 Apps
- PPM Verticals
- Custom PPM Solutions

Services

- Project Configuration
- Mentoring And Support
- Project Assessments
- Hands-on Workshops
- Virtual Upgrades

- Power BI And Dashboards
- Microsoft Planning Services
- Training Courses

Learning Objectives

In today's webinar we will learn how to:

- Understand the benefits of using a SharePoint List for Project Ideation
- Understand how to create the list
- Understand how to promote the item to a project in Project Center

SharePoint List vs Project Center

SharePoint List:

- Track all project ideas
- Visibility of all pipeline projects
- Project idea can be approved at a later date
- Reduces the number of projects and project sites in PWA

Project Center:

- Pipeline projects can be pulled in to reports
- Resource Plans/Engagements can be created to forecast resource availability
- Views can be grouped by Project Stage/State and filtered

Steps required to create and use an Ideation List:

- 1. Identify fields needed for the request and make sure identical fields exist in Project Online (Enterprise Custom Fields)
- 2. Create a new Project Detail Page(s), if needed
- 3. Create a new SharePoint List
- 4. Navigate to the new list
- 5. Create a new item (request) to the list
- 6. Map request fields to Project Online fields
- 7. Promote the request to Project Center

1. Enterprise Custom Fields and Look up Tables

- Additional Fields needed?
- Enterprise custom fields and look up tables must be an exact match to those in PWA
- Changes to the look up table in PWA must be made in the choice value list in SharePoint
- The fields will not map properly if they do not match

2. Project Detail Pages

• Will additional Project detail pages be needed?

Financial Information	(1) Project	Shire IT Financial Information page
OOTB Project Information	(2) New Project	This section captures basic project information, such as, project name and
Portfolio Information	(2) New Project	Shire IT Portfolio Information page
Project Information	(2) New Project	Shire IT Project Information page
Project Details	(2) New Project	This section captures detail information about the project
Schedule	(1) Project	This section captures Schedule information (like Milestones and Tasks)
Strategic Impact	(1) Project	This section captures how this Proposal impacts the Strategic Business Driv
Workflow Stage Status	(3) Workflow Status	Displays the current workflow stage and status

3. Creating the New List

- Click on the cog wheel
- Select Site contents
- Click A

BROWSE ITEMS LIST	
(+) new item	
Summary View All Items BP Lead / Sponsor ···· Find an item ${\cal P}$	
✓ Initiative Name (Project Candidate) Stack Rank IT Area BP Lead / Sponsor Funding Source Overall Project S	tatus 1
Count= 92	
IT Area : Commercial (14)	
▷ IT Area : Corporate Functions (6)	
▷ IT Area : Enterprise Applications (12)	
IT Area : Enterprise Architecture (3)	
IT Area : Information Security and Compliance (2)	
> IT Area : Infrastructure and Service Management (6)	
▷ IT Area : R&D (18)	
IT Area : Strategy and Program Management (3)	
[▷] IT Area : Tech Ops (28)	

For ease of use add a link to the list to the quick launch

4. Navigate to the List

- Click on the cog wheel
- Select Site contents
- Find your new list and click on it

For ease of use add a link to the list to the quick launch

5. Adding an Item to the List

• Select new item and complete the fields

⊕ new item

Initiative Name (Project Candidate)	*
Stack Rank	
IT Area	\checkmark
BP Lead / Sponsor	
Funding Source	\checkmark
Overall Project Status	Pipeline 🔽
Target BC Submission	
Target Start	
Target Finish	
Shire Project Type	\checkmark
Dependency Type	\checkmark

6. Mapping List Fields to Project Fields

- Highlight the row of the list item
- Select the Items tab | Create Projects
- Map the fields (only needs to be done once)

Create Projects in P	roject Web App)	
Field Mappings			
Choose how the columns in this list will map to	Column Name	Data Type	Project Web App Fields
fields in Project Web App.	(Project Candidate)	Single line of text	Project Name
	Stack Rank	Single line of text	Stack Rank 🗸 🗸
	IT Area	Choice	IT Area 🗸 🗸
	BP Lead / Sponsor	Single line of text	BP Lead / Sponsor
	Funding Source	Choice	Funding Source 💙
	Overall Project Status	Choice	Overall Project Status 🖌

7. Promoting the Request to Project Center

- Select the Enterprise Project Type
- Create Project

The project will now be visible in Project Web App

Microsoft PPM

Demo

Now that you've selected the project ideas you want to consider, it's time to prioritize those ideas and maximize your organization's strategic value by selecting the RIGHT projects!
